If pregnant or nursing, consult a healthcare practitioner before using.

Manufactured by a cGMP compliant facility exclusively for: EuroPharma, Inc. Green Bay, WI 54311 (866) 807-2731 EuroPharmaUSA.com

- Promotes healthy uric acid balance
- Supports joint flexibility and comfort
- Aids recovery after exercise
- Provides superior antioxidant effects\*

According to Boston University Research, over 50 million Americans could benefit from support of joint flexibility and healthy uric acid levels. Terry Naturally® Tart Cherry capsules provide the benefits of tart cherries in the convenience of a capsule.

Tart cherries contain anthocyanins, richly colored flavonoid compounds with high antioxidant capacity. Antioxidants increase the body's resistance to oxidative stress and may play an important role in supporting healthy uric acid levels in the body.\*

### Concerned About Sugar?

Tart cherries have long been promoted for their health benefits, but the sour taste means many juices have added sugar. One popular concentrated tart cherry juice lists 80 calories and 15 grams of sugar per 1 oz. serving. That's a lot of sugar in a small shot of juice. As a comparison, a 1 oz. serving of a cola soft drink may have less than 12 calories.

Terry Naturally Tart Cherry capsules are a smart cherry choice for people concerned about the amount of sugar in their diets. Also, the cherries are freeze-dried to retain their nutritional benefits instead of spray- or drum-drying, which causes nutrient loss.

## Frequently Asked Questions for Tart Cherry:

### Q. Why did you come out with a tart cherry product?

A. In recent years, scientific research on the benefits of tart cherries has increased. In addition, tart cherry trees tend to be hardier, so they're less susceptible to harsh weather conditions, which helps ensure a consistent supply of raw materials.

### Q. Why is freeze-drying so important?

A. Freeze-drying cherries is a sensible way to maximize their benefits. Cherries are an extremely nutritious fruit, containing important nutrients such as lutein and zeaxanthin, beta carotene, vitamins A and C, potassium, calcium, and magnesium. Freeze-drying, rather than spray-drying or drum-drying, ensures that the cherries retain their beneficial nutrients instead of losing them during processing (by exposing the berries to heat).

### What to pair with Tart Cherry:

- **Curamin®** – A blend of highly-absorbable, clinically studied curcumin and boswellia, DL-phenylalanine, and nattokinase for pain relief.\*†
- **Healthy Knees & Joints™** – Supports knee and joint flexibility and mobility.\*

† Occasional muscle pain due to exercise or overuse
