Traumaplant® Comfrey Cream

BX01385.06

Traumaplant Comfrey Cream is the exception to other topical comfrey creams. Comfrey has been a highly-regarded herb for thousands of years. The specialized comfrey (*Symphytum x uplandicum NYMAN*) in **Traumaplant** features the goodness of the plant's key elements—rosmarinic acid, allantoin, and choline—from the flowers, stems and leaves.

Traumaplant comfrey is grown in Germany without chemical pesticides or artificial fertilizers, and is free of the toxic pyrrolizidine alkaloids found in more common comfrey varieties extracted from the root.

Traumaplant brings the rich goodness of this amazing botanical to smooth out life's bumpy road. It is the perfect comfrey cream for your entire family.

DIRECTIONS: Apply liberally several times daily, or as often as desired. Safe for adults and children 4 and up.

For external use only.

Avoid contact with eyes. Store at room temperature (68-77°F).

Keep out of reach of children. Paraben Free.

Product of Germany

VEGAN

Frequently Asked Questions for Traumaplant®:

Q. What about toxic pyrrolizidine alkaloids (PAs)? Aren't they common in comfrey?

A. In common comfrey extracts from the plant's roots, PAs can be a concern. With Traumaplant, you don't have to worry—for two reasons. First, the specific comfrey plants used for Traumaplant have been grown to be free of PAs, and secondly, only the flowers, stems and leaves (not a source of PAs) are used to make Traumaplant cream.

Additionally, the growing plants are carefully monitored to ensure they are never contaminated with other comfrey species.

Traumaplant retains all the beneficial components of the plant—choline, rosmarinic acid, and allantoin—without the harmful PAs.

Q. Is it okay if my children use Traumaplant?

A. Yes. Traumaplant's properties are perfect for children ages 4 years and older. In fact, Traumaplant is approved for children 2 years and older in Switzerland.

Q. Can Traumaplant Comfrey Cream be used on a daily basis?

A. Yes, Traumaplant can be applied as desired, and is safe and non-irritating for daily use.
