GENACOL® ORIGINAL BENEFITS FOR YOUR JOINTS

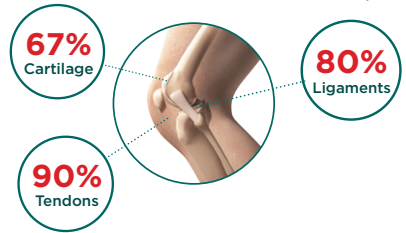

What is Collagen?

Collagen is an important structural protein found everywhere in our body. Cartilage, tendons, and ligaments are mainly composed of this protein. Over time, the human body produces less collagen naturally. In our thirties, collagen production decreases by about 1% per year, a percentage that increases from the age of 50. This can affect the function of collagen-rich tissues such as the joint structure.

PERCENTAGE OF COLLAGEN IN JOINT STRUCTURE

Genacol® Original Benefits for Joint Health

Adding Genacol® Original supplement to your daily routine is a great way to reduce the effect of collagen loss as it gives the body the tools it needs to promote the collagen level in your joints. Genacol® Original is a natural, safe, and effective solution to maintain your joint health and thus relieve discomfort and stiffness.

An Exclusive Patented Technology

AminoLock® Collagen is a unique ultra-hydrolyzed collagen made with our patented technology: AminoLock® Sequence Technology. This process makes it possible to obtain peptides with the smallest molecular weight used among all the bovine collagen products available on the market. This characteristic makes the AminoLock® Collagen easily absorbed by our body for better results.

Scientifically Proven Effectiveness

To date, three independent clinical studies demonstrate the effectiveness of AminoLock® Collagen in relieving joint discomfort and stiffness thanks to its unique combination of peptides known for their benefits on joint health.
